Benefits Dale brings to the Role: The Project Manager (PM) is responsible for the success of the construction project. Dale oversees every aspect, including the planning, execution, monitoring, control and closure. Dale McIntosh ensures that timeframe targets and budgets are met. He also holds the position of Environmental, Health & Safety Manager where his primary work is to prevent incidents such as injuries, illnesses, and harmful environmental releases. Mr. McIntosh oversees the HS Officer to ensure site works are carried out safely and with sound environmental stewardship in accordance with HASAWA 1974 and EPA 1990. He personally provides staff safety training and certifies all lifting equipment. He reviews and approves all HS reports and ensures compliance with the applicable legislation at all times. Dale has been trained in Balmoral water tank assembly and testing. Dale has also been trained to be a GF Pipe Fusion Welding Trainer and is also a certified Fire Door Inspector. Further his NEBOSH Health and Safety Training makes him well qualified to ensure a safe place to work.
